Youth	I was born in Utrecht, the Netherlands, and my family was moving around in Norway until we settled down in a small village called Kirkenær
Family and worklife	I`m not married, and my two „kids“ have fur and four legs. I have a phd in veterinary medicine, and I am a specialist in animal welfare and health. My passion, science and interest are animal welfare in general. Since 2017 I`m working at the Norwegian Food Safety Authority, dealing with animal welfare
My first dog	Since I was born my family always had a dog. There were Irish and English Setters, Labradors and German Shepherds. My first dog owned by myself, was a German Shepherd, who I rescued through my work at the Department of Internal Medicine, at the Norwegian University of Veterinary medicine in 1989.
Dalmatians	My first Dalmatian was Dalmo's Lastvictor (Victor), born on the 2th of August 1995, sired by breeder Kirsti & Tyge Greibrokk. Until today I have been the happy owner of 4 males breed by Dalmo. Dalmo's Brown Banker (Victor) and Dalmo's Instant Love, who are unfortunately no longer with us, but Dalmo's Quartermaster (Ludwig), and Dalmo's Sound of Music (Alois), are still doing well and are making my life fulfilled.
Dogs at present	Today Ludwig (6 yrs) and Alois (3 yrs) living with me in Telemark, a small village in Norway
Breeding activities	There are many reasons why I`m not breeding myself, or being active at dog shows.
Memberships in dog clubs	Member of the Norwegian Dalmatian Club and the Norwegian kennel Club
