Youth	Born on July 22th 1948 in Hard (Region Bodensee) in Austria. I grew up surrounded by farm animals
First dog of my own	My first dog was a miniature Pinscher which I had during my childhood
Family and Job	<p>Married with 2 adult children now, I spent my childhood, school and apprenticeship in my home region Vorarlberg. Moved to Munich as a young adult to do my master craftsman diploma as directrice. Due to my professional commitments I couldn't have any dog for quite some time.</p> <p>However, when we started our family life we decided to have a dog. During a visit at a friend's house I was greeted at the door by a Dalmatian who charmed me with his typical Dalmatian smile</p>
Dogs at present	<p>Cira von der Montforter Ebene, Dalmatian bitch (*01.05.2003)</p> <p>Nieke von der Montforter Ebene, Dalmatian bitch (*24.04.2012)</p> <p>Ophelia von der Montforter Ebene, Dalmatian bitch (*28.07.2012)</p>
Dalmatians, early years	<p>We got our first Dalmatian in 1984, she was a 7 year old bitch "Bianca from Hörmania" called „Assi“ from Vienna. She reached the age of 15.5 years in very good health.</p> <p>A year later, in 1985 we acquired 9 month old Dalmatian bitch "Yucca vom Dalheim" who became the founding bitch of our Kennel "von der Montforter Ebene".</p> <p>Yucca was bred in the kennel "vom Dalheim" of Mr. Burghard Hayek from Walpertshofen, Germany who supported us during our breeding start. His outstanding knowledge and his relentless drive for breeding excellent Dalmatians supported us through many years.</p>
Breeding activities	<p>Breeding Dalmatians since 06.06.1986, kennel name „von der Montforter Ebene“, first litter with „Yucca vom Dalheim“. In 29 years we bred 41 litters of Dalmatians via 7 generations of dogs. We thrive to breed sound and healthy dogs, and to exclude unwanted genetics wherever possible. Breeding means trying to continue and improve good genetics.</p> <p>Our breeding efforts are proudly crowned by numerous champion dogs over many years: Anima, Basile, Cliff, Lola, Viva, Vita, Xibaro, Fee, Lord Leonard (all "von der Montforter Ebene) to name only a few of them.</p> <p>I want to motivate more people to breed Dalmatians; there is so much joy about it. Even after many years and decencies of breeding I am still amazed how much joy a litter of puppies brings in our life and how nervous I am before the whelping starts.</p> <p>My wish is to keep the Dalmatian breed alive and introduce them to more people; they are wonderful creatures which deserve to be known as such.</p>
Breeding summary	<p>41 litters of Dalmatians since 1986 ongoing</p> <p>Latest Litter "PP-litter from the Montforter Ebene" whelped on April 3, 2015 from bitch "Nieke von der Montforter Ebene"</p>
Functions	<p>Active member in the Austrian Dalmatian Club from the beginning of my Dalmatian history</p> <p>Member of the Executive Committee of the Austrian Dalmatian Club since 15 years (member and president of the breeding committee, Vice president of the Austrian Dalmatian Club, Dalmatian-in-need-committee, and others)</p>
Honours	Awarded with the Honorable Membership of the Austrian Dalmatian Club in March 2015

Hard, May 2015
